

# Shipping Command Center

## Reducing Human Performance Errors

Built on over 45 years of trusted expertise, WMG offers subject matter expert (SME) support with its Shipping Command Center (SCC) designed to enhance your radioactive waste management operations. This all-encompassing 24/7 service provides seasoned SMEs that will help you manage and improve every aspect of waste characterization, classification, transportation, and disposal logistics.

To reduce *human performance errors*, both the US Nuclear Regulatory Commission (NRC) and the Institute of Nuclear Power Operations (INPO) strongly recommend peer reviews of waste management activities such as characterization and preparation of shipping documentation, e.g., NRC Forms 540, 541, 741, etc.

**WMG's Shipping Command Center provides a thorough peer review, helping to identify and reduce human performance errors.**

## Features

WMG's Shipping Command Center is provided remotely and includes the following:

- ✓ Access to our nuclear engineers, characterization and waste management experts plus IT support for our RADMAN™ Suite.
- ✓ 24/7 availability for the plant's radwaste management personnel to support and coordinate emergent radioactive materials/waste shipments.
- ✓ Support of plant personnel to:
  - Order containers, e.g., liners, boxes, drums, etc.
  - Coordinate transportation logistics, including ordering and scheduling of casks.
  - Coordinate with disposal site's vendor waste acceptance criteria requirements and logistics.
- ✓ Annual independent review in compliance with 10 CFR Part 61 for waste streams, e.g., dry active wastes (DAW), resins, filters, etc.
- ✓ Cask gamma source strength calculations specifically for the 8-120 Type B cask
- ✓ RADMAN™ characterization & classification of material/waste
- ✓ Preparation and review of shipping papers, written descriptions for marking & labeling, collection of photographic evidence of consignment, etc. Includes upload to plant database

WMG's Shipping Command Center service can be complemented with our Pro-Shipper service that provides hands-on, boots on the ground support for your waste management needs and staff support.

**Nothing Mitigates Risk Like Experience**  
**Service | Innovation | Value | Integrity**
