

WMG'S NEW

Inventory Management System

Inventory management, tracking, and reporting designed for the radwaste industry

- ✓ Track and report Part 37 limits using real-time data
- ✓ Create quarterly inspection checklists with the click of a button
- ✓ Locate containers and equipment instantly – no matter where
- ✓ Integrate with your existing RADMAN™ inventory

WMG's new inventory management system (IMS) is a modern web application which helps you coordinate your inventory management, tracking, and reporting tasks with a single tool.

Features

- ✓ **Receive** and track containers, rad & non-rad material, and equipment
- ✓ **Define** your own limits to report and notify based on dose rates, SNM/fissile material, activity, and more
- ✓ **Organize** your site into locations and zones, each with their own limits
- ✓ **Import** packages directly from RADMAN™ to be tracked, and export packages back to RADMAN™ when you're ready to ship

Replace multiple clunky, slow and out-of-date spreadsheets!

- ✓ Create your own custom reports and export directly to Excel or PDF
- ✓ Load package contents, split materials, and transfer between locations
- ✓ Use the same powerful WMG characterization method as RADMAN™

Get in touch today to see what RADMAN IMS™ can do for you!
